Continuation of 3. NOTE: The new limitations in claims 7 and 9, raise new issues that would require further consideration and/or search. The new limitations in claims 7 and 9 are as follow: "Forming a conductive material on the entire surface to bury the" conductive material between insulating film spacers and the insulating film spacers "only" remain at both "sides" of the second contact plug; Forming first spacers on "sidewalls of" the first conductive layer patterns and "removing the first interlayer dielectric on the isolation region" and forming second spacers on "sidewalls of" the second conductive layer patterns.

Continuation of 11. does NOT place the application in condition for allowance because: Park shows in (figure. 7D), removing the conductive material 214, in the isolation region. Park also shows in (Figures. 9B-9C), forming a photoresist (226) on the insulating substance in the peripheral region PA2 (See col.9, lines 19-25), and then removing the photoresist (226) on the peripheral region PA2 (See col.9, lines 26-27) along with insulating spacers (212).
